superwien together with Exhibit: and the municipality (Општина Центар - Официјална фан страница) are working on a dialogue oriented urban upgrade project in the Debar Maalo neighbourhood in the central area of Skopje, Macedonia. We are thrilled that our community workshop at Public Room last month got so much attention by the neighbours, architects and artists. See a TV report by Novatv Web about the collaborative planning process and the discussion about the neighbourhood. This project is funded by KDZ - Zentrum für Verwaltungsforschung, Österreichischer Städtebund and the Austrian Development Agency.
