Project description

The Rep. of Moldova and the EU signed the Association Agreement (AA) on June 27, 2014, as a significant step forward to an EU integration. A great number of new EU regulations and legal procedures must be implemented within a limited time period. Significant help is needed for an updated legal framework and for the transition of current technical standards (old Soviet SNiP norms of the 80s). The project shall contain legal advice for drafting bills, workshops for EU experts with their Moldovan counterparts, seminars for technical multipliers (e.g. engineers) about EU norms, and cooperation with universities for an improved curricula.

Project goal

The project goal is a strategic guidance for implementing AA terms on EU norms and codes leading to (i) a new legal framework based on the experience from EU countries, (ii) well trained experts, scientists as multipliers, and (iii) a sustainable know-how transferred into daily application.

Beneficiaries and target groups

- Experts on all levels (ministries, agencies and technical institutes)
- Private sector (engineers, craftsmen)
- Sciences and education (universities)

Constraints and risk appraisal

The Republic of Moldova is lacking sufficient funds as well as 'own' experts for an independent implementation of EU norms and codes. The approximation for the set terms in the AA is the end of the year 2015.

Note: Since the implementation of the AA is a state goal, risks are minimized.
