

PARTICIPATORY URBAN AGRICULTURE FOR INCLUSIVE CITIES

📍 MOM KULTURÁLIS KÖZPONT, BUDAPEST

The final conference of the AgriGo4Cities project aims to promote participatory urban and periurban agriculture (UPA) in order to tackle socio-economic exclusion of vulnerable groups and stimulate sustainable urban environment.

Since the beginning of the project the partnership collected and synthesized relevant knowledge about UPA, developed a concept of participatory UPA and implemented pilot actions in six locations in the Danube Region to test the jointly developed methods.

The transnational conference, coordinated by the Central Transdanubian Regional Innovation Agency, will bring together scholars, practitioners, NGOs, activists, policymakers and public institutions' representatives with the aim of discussing the following topics:

- How UPA contributes to the development of vibrant community-building spaces, platforms for competitive economic models and clean and sustainable urban environment?
- How to integrate participatory approach into public decision-making?
- How to motivate and empower vulnerable/marginalized groups to become socially and economically more engaged by participating in decision-making processes?

The language of the conference is English, but Hungarian translation will be provided by the organizers.

There is no registration fee for the participants. However, the participants should cover their travel and accommodation costs themselves. Lunch and catering on the day of the conference will be provided by the organizers.

Project co-funded by European Union funds (ERDF, IPA, ENI).
